Online Behavior:

Online shopping: ★★★★★

Social Media: ★★★★★

Goals & Motivations

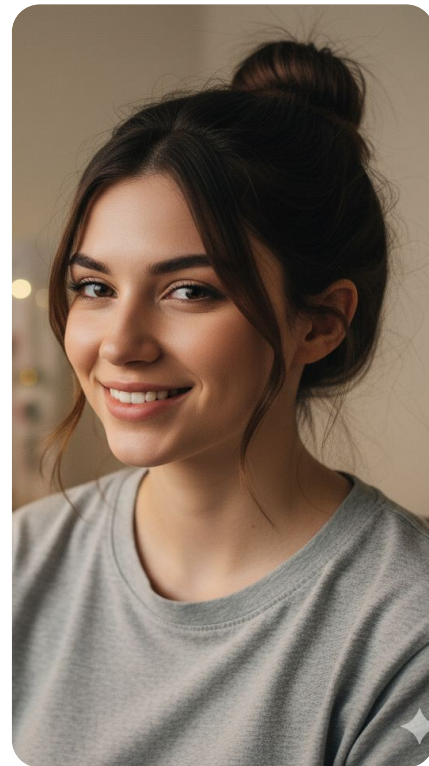

Academic success, personal growth, and making connections

Pain Points

Trouble falling asleep. There are too many products on the market that don't work

Behavior & Preferences

Inconsistent pre-sleep routine, influenced by others

Customer Profile

Smarter Sleep Starts Here

Jobs

- Set up for a productive and energized state
- Track sleep long term

Pains

- Impractical solutions
- Uncomfortable/noticeably there
- Feels like even more of a hassle
- Too complicated/hard to use

Gains

- Customizable to routine
- Reliable, proven stats via phone, ready to interpret
- Comfortable and sustainable solution

Value Map and Value Proposition

Product

Bose Sleep Headphone

Pain Relievers

Easy to navigate
Ear mold kit for custom fit
Nearly nonexistent to user
Improves quality of sleep for more energized day

Gain Creators

Adapts to each user's routine
Tracks your sleep stats
Immersive sound that blocks external noise
Clear, tangible proven results
Long time use

The Future of Rest, Made Simple.

The Bose Sleep Headphone provides a comfortable, customizable, and effortless way to improve sleep, combining sleep tracking technology with personalized comfort to fit any nighttime routine.

Unlike complicated traditional sleep products, our sleep headphone offers easy navigation, a custom fit, a barely there design, and features made to enhance sleep quality.

New Offer Positioning

Sleep Reimagined.

Bose Sleep Headphones — designed to redefine the sleep experience through personalized comfort, immersive sound, and intelligent rest tracking.

Immersive Noise-Cancel ing Sound

Backed by survey data, over 84% of respondents rated noise cancellation as highly effective in reducing mental clutter.

Comfort was rated 3.5/5, confirming that the custom mold kit concept delivers superior comfort and long-term usability.

Customizable Fit for Comfort

Smart Personal ization

The connected app adapts to users' activity levels, lifestyle, and health data, which 81% of users found appealing.

- Free vs subscription version with daily insights

Key Activities

- Marketing Activities
- Tech Activities
- Trial Group
- Production
- Sales Activities

Key Partners

- Spokesperson (Athletes, influencers, celebrities)
- Spotify or other audio platform

Hypotheses

Testing the Power of Sound to Reduce Mental Clutter

HYPOTHESIS 1

Consumers will view immersive sound as highly beneficial for blocking out mental clutter.

WHY CRITICAL

Reducing mental clutter is key to helping users fall asleep faster and experience deeper rest.

TEST

Ask participants how much they think immersive sound will be beneficial for blocking out mental clutter versus noise cancellation

TEST RESULTS

72.5% rated immersive sound ≥ 3.5 for reducing mental clutter.
84.1% rated noise cancellation ≥ 3.5 for reducing mental clutter.

INSIGHT

Highlight both immersive sound and noise cancellation, with slightly greater emphasis on noise cancellation in positioning and messaging.

Testing the Power of Customization

HYPOTHESIS 2

Users who can customize their experience (ex: input activity levels, health data) will feel more satisfied and receive more accurate insights.

WHY CRITICAL

Personalization builds trust and perceived value and users want data that reflects their lifestyle.

TEST

Ask participants how interested they would be in customization features in the app connected to their sleep headphone on a scale 1 to 5

TEST RESULTS

- Average rating: 4.05 / 5
- 81% rated interest 3.5 or above

INSIGHT

Emphasize customization features in app messaging and product demos to showcase personal accuracy and control.

Testing the Impact of a Custom Mold Kit

HYPOTHESIS 3

Offering a customizable mold kit will lead to high perceived comfort among consumers.

WHY CRITICAL

Comfort is a critical driver of sleep quality and long term product use.

TEST

Measure on a scale, how comfortable they think a custom fit headphone would be on a scale of 1 to 5

TEST RESULTS

70.4% ranked comfort 3.5 or above

INSIGHT

When marketing comfort, highlight the custom mold kit as a key differentiator.

Critical Risks

High price sensitivity

Survey responses showed mixed willingness to pay between \$125–\$175. Some consumers may see this as expensive compared to standard sleep aids.

Technology dependency

Users may fear dependency on tech for natural sleep or worry about device comfort while lying down.

Data privacy

The app collects sensitive sleep and health data, which could raise privacy concerns.

Success Factors

Ensuring a successful Launch

Organizational Support

For a successful launch, we need cross functional collaboration across key departments

Product & R&D:

Continued development of comfort features and mold-fit testing

Marketing

A strong campaign focused on “Sleep deeper, Wake stronger” and emotional storytelling around rest and recovery

Sales Specialists

In store demos at Bose retail and partners stores letting users feel the comfort of the product

Ensuring a successful Launch

Budget & Resource Allocation

We would have to allocate money to cover marketing and tech advancement

Marketing

Influencer
partnerships
focusing on wellness
and sleep creators

Marketing

Digital ads targeting
students and
professionals

Tech

Research funds for
app analytics and
metrics tracking

Thank You!
